

# Omnipresence 3D for Public Safety

To ensure the safety of the public, numerous parties need to be able to access a video surveillance system. For an effective deployment of video surveillance for public safety, the system must be simple to use and valuable for all interested parties.

## 3 Benefits of Omnipresence 3D for Public Safety

### Gain Unparalleled Situational Awareness from Your Video System

Omnipresence, as a geographically-based video system, is designed to enable security personnel to monitor video on city-wide scale. A 3D map of the entire area puts all data in context to make it simple for any user to rapidly find what they are looking for.

### Infinite Scalability

By integrating with numerous video systems and synthesizing this information into one unified visual environment, Omnipresence neutralizes the challenge of scalability. Omnipresence is designed for use with an unlimited number of cameras and users.

### Ease of Use for All Parties

Public safety applications often involve multiple parties or departments who expect to be able to access and use the video surveillance system. Omnipresence provides an intuitive visual interface to the system which can be used by all departments with minimal training.

---

The Omnipresence 3D Surveillance System is designed to protect facilities where security is a critical concern. To learn more about how Omnipresence can be integrated with your security system, contact a Feeling Software representative.
