

Omnipresence 3D for Utilities

The energy sector is the heartbeat of today's global economy. To secure such a vital piece of modern infrastructure requires multiple layers of security systems and significant planning. To understand and utilize these diverse security systems, security professionals turn to the Omnipresence 3D Surveillance System.

3 Benefits of Omnipresence 3D for Utilities

Visually Understand All Security Information

Omnipresence provides a 3D framework for the information flowing in from a wide variety of security systems. With Omnipresence, this information can be understood visually, at a glance. Through integration with your security systems, Omnipresence provides a common, visual interface to your facility's security.

Gain Situational Awareness from Alarms

Within Omnipresence, any alarm can be set to instantly provide a big picture understanding based on the alarm's physical location. With Omnipresence, control room operators gain an unparalleled situational awareness, enabling smarter incident response.

Track Suspects across the Entire Facility

With an understanding of the coverage of every camera in the surveillance system, Omnipresence provides security operators the tools that they need to track a suspect from camera to camera throughout an entire facility, with no need to memorize camera locations and call numbers.

The Omnipresence 3D Surveillance System is designed to protect facilities where security is a critical concern. To learn more about how Omnipresence can be integrated with your security system, contact a Feeling Software representative.
